

OnPoint Consulting, Inc. (OnPoint) is pleased to announce the award of a 10-year, \$59 million contract with the U.S. Air Force to provide IT services to the Air Force District of Washington (AFDW). Headquartered at Andrews Air Force Base, AFDW is the Air Force component for the National Capital Region under Joint Force Headquarters-National Capital Region Command.

Under the AFNCR (Air Force National Capital Region) IT contract, OnPoint will provide Information Assurance, Operations & Maintenance for Headquarters Air Force (HAF) Unique Systems, Asset Management, and Video Teleconferencing (VTC) Solution Engineering. OnPoint's subcontractors on the AFNCR contract are Hewlett-Packard (HP) and Datum Software, a small, woman-owned business with more than 10 years of experience supporting the Air Force. Most of the work will be performed at Joint Base Andrews, Joint Base Anacostia-Bolling (JBAB) and the Pentagon.

OnPoint will support the AFNCR government staff in maintaining architectural, technical, and procedural data and products. This includes preparing and maintaining documentation and reports to support AFNCR compliance with applicable laws and regulations, improving energy efficiency, reducing emissions, and supporting civil engineering efforts. In addition, OnPoint will capture architecture, requirements, objectives and policies, and roles, processes, and procedures to develop implement, oversee and maintain the AFNCR Information Assurance (IA) Program.

"We are excited to apply our expertise in cybersecurity, infrastructure services and enterprise systems to support AFDW under the AFNCR contract," said Michael Agrillo, Executive Vice President of OnPoint.

### ***About OnPoint***

OnPoint is a technology consulting firm that helps its federal customers get ahead of IT™ by providing critical thinking, strategic analysis, and thought leadership to improve performance, lower costs, and achieve results. The company's commitment to improvement is expressed in its ISO 9001:2008, ISO 20000-1:2011, ISO 27001:2005 certifications and CMMI Maturity Level 3 rating.
