

OnPoint Consulting, Inc. (OnPoint) is pleased to announce that it has retained a Maturity Level 3 rating with the Software Engineering Institute's Capability Maturity Model Integration for Development (CMMI®-DEV). CMMI is an internationally recognized method for evaluating and measuring the maturity of an organization's development processes.

The CMMI maturity level 3 rating independently confirms that OnPoint has well-defined, effective, and repeatable processes for managing requirements, decision making, measuring performance, planning work, and risk management in their solutions development and delivery practice. It also confirms that OnPoint continues to maintain a focus on continually improving their processes.

"This rating is a direct result of OnPoint's commitment to the continuous improvement of processes," said Tim Smith, President. "Our focus strengthens our partnerships and is right in line with the values of our client-focused delivery and growth."
